## WORK EXPERIENCE

---

### Software Developer

March 2025 – Present

#### CAI-STA Philippines Inc.

- Developed and maintained a Food Production Management System using Angular, enhancing operational efficiency for shipboard culinary teams.
- Translated Figma UI/UX designs into responsive, pixel-perfect front-end components with strong cross-browser compatibility.
- Collaborated closely with designers, product managers, and backend engineers to deliver end-to-end features aligned with business goals.
- Conducted thorough code reviews to uphold code quality, consistency, and team standards.
- Work under Food & Beverage, Royal Caribbean Group

### Frontend Developer React

Nov 2022 – March 2025

#### Vtime Tech Consulting Inc.

- Design, develop, and maintain React applications using Next.js, Tailwind CSS frameworks.
- Implement front-end development based on product requirements and design specifications.
- Conduct code reviews and write technical documentation to ensure code standards and accuracy.
- Collaborate closely with designers, product managers, and the back-end team to drive project development.
- Convert Figma and PSD designs into responsive, high-quality code.
- Ensure pixel-perfect alignment and cross-browser compatibility.

### WEB DESIGNER / FRONTEND DEVELOPER

Jun 2018 – Nov 2022

#### Vtime Tech Consulting Inc.

- Design and create images, graphics, and websites for both client projects and internal company use.
- Code websites from scratch using HTML, CSS, JavaScript, and relevant web frameworks.
- Provide ongoing support and manage client requests and updates for websites.
- Collaborate with PHP developers on frontend-related matters for the client's

admin system.

- Implement system APIs on the frontend to ensure seamless integration.

## **EXECUTIVE WEB DESIGNER**

**Nov 2015 – Apr 2018**

### **AGR Operations, PERSONIV**

- Responsible for creating adaptive websites based on client requests and setting standards using the Thryv website builder (CMS).
- Analyze UI/UX designs to ensure responsive layouts and improve overall usability.
- Maintain and update legacy (outdated) websites to ensure continued functionality.
- Develop prototypes and high-quality mock-ups to visualize design concepts.
- Perform browser testing and debugging to ensure cross-browser compatibility and optimal performance.
